

GREEN EMULSION BATHROOM CLEANER

DIRECTIONS

For Toilets: It is not necessary to remove the water from the bowl. One ounce is sufficient to remove soils, rust, lime, scale and uric deposits and deodorize. Open flip top, invert bottle and with light pressure, direct stream completely around underneath side of toilet bowl rim. Allow at least 10 minutes contact time for surface to be cleaned. Wet bowl mop in solution and swab all surfaces including seat and lid. Rinse. Repeat application for cleaning heavily encrusted deposits.

Solid Porcelain Urinals: Place bowl mop over drain. Add enough water to make a solution and follow the same procedure as for toilet bowls. This product will not damage solid porcelain china or vitreous ware.

Shower stalls, glazed or other ceramic tile and grouting: Use one ounce in a gallon of water, allow 10 minutes contact time for surface to be cleaned, rinse thoroughly. These surfaces may be cleaned without damage.

Other surfaces: This bathroom cleaner may be used on most metals (including aluminum and stainless steel) at 1 ounce per gallon of water. Rinse thoroughly. On chrome or porcelain enamel, dilute 1 part to 4 parts of water and allow only a few moments contact time. Rinse well with water. Do not use on chipped or cracked surfaces of these materials. Septic tanks will not be affected.

APPLICATIONS

Product for Use In:

- >Urinals
- >Showers
- >Tile and Grouting

SPECIFICATIONS

Color	Green
Fragrance	Mint
pH Range.....	<1.0
