

# DELIMER CONCENTRATE

## DESCRIPTION

Concentrated lime remover. Removes scale, lime, rust, and mineral deposits.

## DIRECTIONS

**DISH WASHING MACHINES:** Fill wash tank with water, add one ounce per gallon of water. Let machine run for 30 minutes and allow it to remove lime deposits. Drain tank. Fill and drain to rinse. (Turn off automatic detergent dispenser while deliming.)

**STEAM CLEANERS:** Dilute one part product with 4 to 6 parts of water according to scale accumulation. Circulate the solution until all scale is removed.

**AIR CONDITIONER:** Dilute 1 to 30, operate unit until all scale is removed. After cleaning is completed, flush thoroughly with plenty of water.

Do not store in metal containers.

Safe on metals for removal of rust, corrosion and scale from iron, steel, copper, bronze and brass. Can be used by immersion or by circulation, by using plastic, glass or wooden containers.

## APPLICATIONS
