

DUST MOP TREATMENT

DESCRIPTION

A ready-to-use treatment for dust mops and dusting cloths. Spray product directly on cloths and mops, simple, easy and convenient.

DIRECTIONS

SHAKE WELL BEFORE USE.

Spray **DUST MOP TREATMENT** about 10 inches from mop to be used for dusting. Use sparingly, applying a light film. Fluff the mop strands and respray. Allow mop to dry overnight before use.

Do not apply spray directly to floors. Dust with a soft, dry, clean cloth or lint free dust mop for best results and a brighter finish.

Use as above on all types of floors: formica, ceramic, and plastic tile.

May also be used to retreat dust mops and wiping cloths.
